

IT SIX Academy Program

IT Six Global Services is a Romanian software company whose main activity is the development of complex solutions and services for the world-wide IT&C environment.

The IT SIX Academy Program is a comprehensive, complementary training program which provides students with the technology and process knowledge essential in larger software projects.

IT Six supports continuous education.

The Academy's mission is to complete the knowledge built during University classes with more advanced concepts, design patterns, best practices and personal abilities required in the global software industry. The purpose is to help students develop practical and teamwork skills to meet the standards of real projects and real deadlines.

This is a technical program, but you will learn SDLC methodologies as well.

What makes IT SIX different is the unique blend of technical proficiency, vertical industry expertise, methodology and process driven approach to engineering, commitment to our clients and partners and the passion for team-work.

IT SIX offers attractive careers in a multicultural successful environment, personal and professional development opportunities, highly qualitative working conditions and the possibility to grow in a competitive company.

Be part of our dynamic and creative team, continue to learn with the best architects in town, bring your contribution to the challenging world of software in one of our technical departments:

Microsoft .Net, Java, C/C++, Database/Business Intelligence, QA/Testing, Flex/Action Script, PHP, Web Design and Remote Infrastructure Management.

Requirements:

- English language mandatory
- Basic OOP skills
- Passion for engineering
- Willingness to invest time to build further knowledge

What IT SIX provides:

The **best trainers in town**, the infrastructure for a professional Academy, the opportunity to work on **challenging software projects** and the good mood to make all this **FUN**.

How to apply?

Email your CV in English to Office@itsix.com and specify the fact that your interest is to join the IT SIX Academy program.
The selection will be based on an interview and a basic IT aptitude test.
