Teams Organization
- teams will be made of maximum 3 members
- each team must register itself giving the following information (use the "Registration Form"):
    - Team name
    - Team members' name
    - Team members' e-mails
    - Name of the theme
    - Description of the theme

Themes Type and Registering
- registration will be done sending the required information ("Registration Form") at the following e-mail address:
hella_embedded_club@yahoo.com
- each team will choose its theme
- themes must be related to **embedded** domain (preferable to be **automotive embedded** but not mandatory)
- each submitted theme will be analyzed by Hella stuff and the best ones will be selected to enter the competition
- the accepted teams will be informed via e-mail
- Hella employees are not allowed to participate at this contest
- participants of the Hella "University Project" can participate to this contest.

Themes Development and Evaluation
- each team will develop its project inside the "Hella Embedded Club" Laboratory
- "Hella Embedded Club" Lab infrastructure can be used (PC, dev. boards, etc.)
- participants own development boards can be used (but these boards have to be microcontroller related)
- at the end of the project each team will provide a written material which will contain detailed information about the project (**project documentation**):
    - implemented system specifications
    - technical solution(s) used
    - hardware used
    - software modules implemented

- test results
- achievements
- other information that need to be recorded
- the final status of each team will be evaluated by the Hella stuff
- the evaluation will be done based on your achievements (e.g. project documentation) and live presentations of each team's project that will be held in front of an audience.
- the best results will be awarded
