

# Ford Romania Intern Program

## Internship Workplan

<b>Project Name:</b>	Web application to control the right accesses to the W drive	<b>Supervisor Name:</b>	Costi Circiumaru
<b>Department Name:</b>	IT	<b>Supervisor CDSID:</b>	ccircium
<b>Assignment Location:</b>	Craiova	<b>Supervisor Position#:</b>	IT Manager
<b>Project Description</b>			

Development of a web application to control the right accesses to the W drive: request, approval, permission / cancellation, confirmation.

### Measurable Objectives

- The application must be accessed via web by all department managers and IT system engineers using their CDSID and password
- Department managers must be allowed to input their requests for access permission or cancellation to the W drive
- IT manager must be allowed to see and approve / reject the access requests
- IT system engineers must be allowed to give / cancel the approved request for access rights
- Department managers must be allowed to see the access rights for their employees

### Expected Major Contributions

- Reduce the time to get access to the W drive
- Better traceability of access rights

### Expected Benefits to Intern

- Work time optimization for managers and system engineers
- Eliminate the errors

### Intern Qualifications (schooling, work experience, major)

- Knowledge of .NET, SQL required
- Web programming skills required
- Demonstrate ability to work with others in a team environment
