Positions available: **2**

PHP DEVELOPER

Our **PHP Department** is looking for an experienced PHP developer to join our team and help designing and developing creative solutions for challenging web based applications in an international environment.

If you are:
- An experienced software developer with PHP experience and knowledge about one of the Symfony, Zend, Laravel or other modern MVC frameworks
- Understanding of open source projects like Magento, Drupal, Wikis, ezPublish, etc.
- An IT professional with theoretical and practical knowledge about OOP, algorithms and databases
- Advanced knowledge of CSS, HTML, and JavaScript
- Passionate about new technologies and innovation
- Ambitious and self-driven
- Proactive and details oriented
- Fluent in English

Then, together with your new team, your responsibilities would be to:
- Participate in defining project architecture and planning
- Design and implement project tasks according to specifications and planning
- Collaborate with the team (PM, developers and QAs) to ensure that project deliverables meet the required quality standards
- Perform research on various technologies and suggest creative solutions
- Provide continuous feedback and offer support and knowledge sharing to other team members

And by joining NetRom you will have the chance to benefit from international standards working conditions:
- Attractive payment and compensations
- Excellent opportunities to learn new things and develop your professional career: trainings, sharing sessions, conferences, international certifications - Microsoft, Symfony, Java Oracle, ISTQB
- Professional environment and working conditions
- Various team oriented recreational activities
