

Would you rather wait for the future. Or take the first step for it?

WOULD YOU RATHER WAIT FOR THE FUTURE. OR TAKE THE FIRST STEP FOR IT?

It's progress that moves the world forward. We're Prysmian Group, the world's leading designer and manufacturer of cables, and progress is the driving force of our business. We help cutting-edge technology make the leap from imagination to reality.

As a result, our cables form the infrastructure people need to make things happen, from power distribution, to the latest internet optic fibres, we help communities get what they need to thrive.

With over 20,000 employees, active in over 50 countries, our specialism in energy and telecoms puts us at the heart of so many everyday products and experiences.

Our people don't just react to today, they shape the things to come.
This is your chance to be one of them.

WOULD YOU LIKE TO BE ONE OF THEM? WHAT WE OFFER.

"Link the Future" is our exciting internship program.

Join us and you will have:

- ✓ Three months of great experience inside our company
- ✓ Consistent career direction by mentorship & career counselling
- ✓ Exposure to a professional environment that fosters valuable principles
- ✓ Potential opportunity to develop a career within a multinational company

We will provide you with the skills and expertise you need to succeed, driving you towards career growth. **Just imagine the possibilities.**

SO WHAT ARE WE LOOKING FOR?

We're searching for students be either in the last year of faculty or involved in a master plan program keen to pursue a technical career.

To apply for the program, you'll need:

- A degree in engineering - or be currently working towards one.
- To have had an outstanding university career
- Speak fluent English and have an international mind-set.
- To demonstrate strong communication and interpersonal skills.

If you think you've got what it takes to succeed in this highly-challenging, yet rewarding environment, send your CV to careers.ro@prysmiangroup.com and start using all your energy and knowledge to help shape the future of the world.
