

Job Description: Automation Developer (Java)

Are you self-motivated, outgoing, and ready for an exciting career? Would you like the opportunity to work **for** one of the world's leading broadcast management system providers and **with** the world's leading television, radio, IPTV, and cinema companies?

JOB PURPOSE

Automation Developers within SintecMedia are responsible for ensuring that our clients receive the best possible quality of software, by automating the functionality of a very complex system that is the OnAir broadcasting management software. This position may require visits to client sites.

MAIN DUTIES AND RESPONSIBILITIES

- Implementing automation software to verify the quality of complex integrated systems
- Executing automation runs and analyzing automation reports
- Manual verification of execution errors
- Training on OnAir modules and other required areas
- Integration with Dev and Configuration Management tools

SKILLS AND EXPERIENCE

Required Skills

- Good Java knowledge
- Good understanding of complex integrated systems
- Knowledge of the software development lifecycle
- Experience with the following technologies: XML, SQL, PL/SQL, XPATH
- Excellent written, interpersonal and verbal communication skills

Nice to Have

- High degree of computer literacy
- Proven experience developing complex automation and scripts using Java
- Hands-on experience running, deploying, and maintaining automated tests
- Experience with test automation using at least one from following tools: **Selenium**, **SoapUI**
- Experienced with SQL or PL/SQL
- Experience automating DevExpress controls

Personal Attributes

- Ability to work in challenging international, multinational teams and manage own time
- Self-motivated, with a high level of self-discipline
- Patience, flexibility and attention to detail
- Delivery focused, with a flexible approach to work and willingness to learn new systems and business lines
- A methodical approach to problem solving and troubleshooting
