## Romania Graduate Program **CUMMINS GENERATOR TECHNOLOGIES**

Cummins is a place big enough to coach and develop a global workforce and create the world's leading clean, generator technology. We're also small enough for you to find your fit and personal passion with a team of dependable, innovative thinkers who are developing their careers within a diverse, inclusive, empowering environment. Learn more about this role and how you can begin *Working Right*.

# Working Right.

We are truly a global company where you can find your fit and make serious contributions. Providing opportunities for Graduate Trainees is an essential part of our strategy to develop the right skills within our organization.

Our two year Graduate Program offers a unique and exciting opportunity to kick off your career at Cummins. You will work on-site with over 850 employees to produce a variety of low and high voltage generators. From your first day at Cummins, we're focused on understanding your talents, current skills and future goals — and creating a plan to get you there.

Your journey begins with planning your development through product awareness and connecting to diverse experiences designed to stretch your limits. You'll receive team feedback about your future aspirations and an action plan to expand your

horizons. As your professional skill set flourishes, you can change business units, accept special assignments, move into leadership and discover amazing career options all around the world.

You will learn how innovative technology, reducing impact on our environment, corporate responsibility and building success within every community is the essence of Cummins. Join us and find out how you can start *Working Right*.
